

Eman Elshimy

GIAC Certified | SANS Scholar | THM Top 1%

0435 699 413 | em.elshimi@gmail.com | NSW, Australia | [linkedin](#) | [emanelshimy.github.io](#)

SIEM (Elastic) | Incident Response | Technical Assistance | Threat Intelligence | Vulnerability Assessment | MITRE ATT&CK | NIST CSF | ISO 27001 | ASD Essential Eight | Python | SQL | GCP/BigQuery | Linux | Windows | OSINT

PROFESSIONAL SUMMARY

GIAC-Certified Cybersecurity Honours Graduate and **SANS/WiCyS Scholar**, selected as 1 of 65 globally. Currently advancing through **GSEC and GCIH**, ranked in the **Top 1% on TryHackMe**, and proven across technical assistance, SIEM engineering (Elastic), digital forensics, and GRC frameworks including NIST CSF, ISO 27001, and the ASD Essential Eight. Ability to bridge the gap between technical incident response and business risk GRC. Strong technical capability and the ability to translate complex findings into clear, executive-level remediation, backed by Honours research and cybersecurity writing. Ready to contribute from day one to a high-performing, proactive team.

CERTIFICATIONS & COURSES

GCIH – GIAC Certified Incident Handler	<i>Est. Sept 2026 SANS/WiCyS Scholar — In Progress</i>
GSEC – GIAC Security Essentials	<i>Est. Jun 2026 SANS/WiCyS Scholar — In Progress</i>
GFACT – GIAC Foundational Cybersecurity Technologies	<i>Feb 2026 GIAC Certified</i>
Elastic Security for SIEM	<i>2025</i>
SOC Analyst 1 / Blue Team / Pentesting / Web Fundamentals	<i>2025 TryHackMe Paths</i>
Cisco Junior Cybersecurity Analyst	<i>2024</i>

CORE SKILLS

SecOps: SIEM (Elastic), log analysis, alert triage, incident handling, threat hunting, threat intelligence, Wireshark

Technical Assistance: Hardware/software troubleshooting, IT support, customer service, help desk operations, data confidentiality, user privacy standards, high-volume call management, client communication

GRC & Frameworks: ASD Essential Eight, NIST CSF, ISO 27001, OWASP Top 10, MITRE ATT&CK, vulnerability assessment, risk assessment, security auditing

Systems & Networking: TCP/IP, DNS, HTTP/S, cryptography, Linux/Windows admin, IDS/IPS, firewalls

Security Tooling: Nmap, Kali Linux, Burp Suite, Autopsy, Wireshark, Metasploit, OSINT, file-hash analysis, VirusTotal

Cloud – Security & Data: GCP, BigQuery, Cloud Logging, Bindplane, security data pipeline architecture

Programming: Python (data processing, scripting and automation), SQL, HTML/CSS

Forensics & OSINT: Autopsy, file-hash investigation, metadata analysis, Windows registry, OSINT

Cyber Metrics: Recall, F1-Score, vulnerability severity ratings, risk scoring, remediation prioritisation

Soft Skills: Stakeholder communication, reporting, cross-functional collaboration, mentorship, crisis management

PROFESSIONAL EXPERIENCE

Peer Learning Coach *University of Wollongong | Feb 2025 – Nov 2025*

Key Achievement: Recognised for delivering measurably improved student outcomes in a coaching programme.

Duties:

- Delivered tailored one-on-one academic coaching across computer science and cybersecurity subjects.
- Designed personalised study plans and practice exercises to address individual knowledge gaps.

PASS Leader – Data Management & Security *University of Wollongong | Jul 2023 – Nov 2025*

Key Achievement: Average student grade improved from 60% to 83%; multi-year role based on consistent outcomes.

Duties:

- Facilitated weekly technical sessions on data management and security for undergraduate cohorts.
- Designed interactive lab exercises and group activities reinforcing core cybersecurity concepts.

PECAN CTF Presenter *University of Wollongong | Jul 2024 & Aug 2025*

Key Achievement: Upskilled participants in forensic techniques; clear, accessible technical delivery to students.

Duties:

- Delivered hands-on Digital Forensics and OSINT workshops demonstrating metadata analysis and file-hash investigation workflows using live CTF scenarios.

Key Achievement: Identified vulnerabilities across various environments; commended for clarity of reporting.

Duties:

- Performed web and network penetration tests using Kali Linux and Burp Suite across client environments.
- Produced technical and executive penetration testing reports detailing vulnerabilities, critical findings, and remediation strategies.

Writer

Incognito Criminology Journal / Women in Security Magazine | 2024

- Authored "The Ransomware Crisis and Mitigation" (Issue 3, 2024); contributed to Women in Security Magazine (Issue 20, 2024).
- Translated complex ransomware threat intelligence into executive-level narratives to reduce human risk for non-technical audiences.

Technical Assistant Volunteer

Illawarra Multicultural Services | Mar 2024 – Nov 2024

- Diagnosed and resolved hardware/software issues for community members, maintaining strict data confidentiality and user privacy standards.

Cyber Cadet

GuardWare | Oct 2023 – Nov 2023

- Conducted threat assessments and delivered cybersecurity awareness campaigns to SME business owners and employees.

Customer Solutions Specialist

PROBE CX (NSW Electoral Commission) | 03/2023 – 04/2023

- Managed high-volume inbound calls and expertly resolved a wide range of customer inquiries.
- Ensured consistently professional communication and delivered a positive user experience.

PROJECTS (Full portfolio & additional projects: github.com/EmanElshimy)

CVE Intelligence Tool (Python, REST API, JSON)

Fetches real-time CVE data from NIST NVD API and translates technical vulnerabilities into plain English for executives.

Log Anomaly Detector (Python, Regex, Log Parsing)

Real-time security event analyzer that detects brute force attacks, SQL injection, XSS, and port scanning from auth and web logs.

Smart Network Scanner (Python, Socket Programming, Threading)

Multi-threaded port scanner with service detection, banner grabbing, and automated risk assessment for vulnerable services.

INDUSTRY EXPERIENCE & SIMULATIONS

Datacom Cybersecurity Simulation

The Forage | Feb 2026

Conducted risk assessments and produced remediation reports aligned to NIST CSF and ASD Essential Eight controls.

ANZ Cyber Security Management Simulation,

The Forage | Apr 2024

Investigated phishing incidents, performed packet analysis, and produced non-technical incident summaries with mitigation recommendations.

PwC US Cybersecurity Simulation

The Forage | Mar 2024

Performed simulated risk assessments and control audits; prioritised remediation mapped to NIST CSF and ASD Essential Eight.

EDUCATION

Honours in Computer Science

University of Wollongong, Australia | 2025

Bachelor of Computer Science (Cyber Security Major)

University of Wollongong, Australia | 2022 – 2024

Outstanding Achievement Scholarship

NOTABLE ACHIEVEMENTS

- Top 1% Global Ranking on TryHackMe and 1 of 65 SANS/WiCyS Scholars selected globally
- PASS Leader: average student grades improved 60% → 83%
- UOWx Leadership Award (2023) — strategic goal-setting and peer mentorship
- UOWx Collaboration & Communication Award (2023) — cross-functional team engagement
